Carbon cycle questions

Look at a copy of the carbon cycle and answer the questions below.

- 1) State the number of processes that remove carbon dioxide from the air.

- 2) List the processes that add carbon dioxide to the air.

.....  
.....  
.....  
.....

- 3) Describe how the carbon compounds in plants end up in animals such as foxes.

.....  
.....

- 4) Describe how a carbon atom in coal could end up in a penguin.

.....  
.....

- 5) Define combustion.

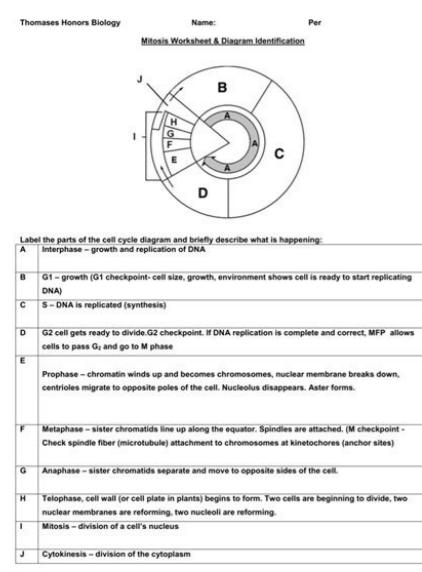

.....  
.....

- 6) Decomposer organisms feed on waste, breaking down carbon compounds to build up their bodies and to use for respiration. What would happen if they all became extinct?

.....  
.....

- 7) Explain why deforestation is a problem for the carbon cycle.

.....  
.....

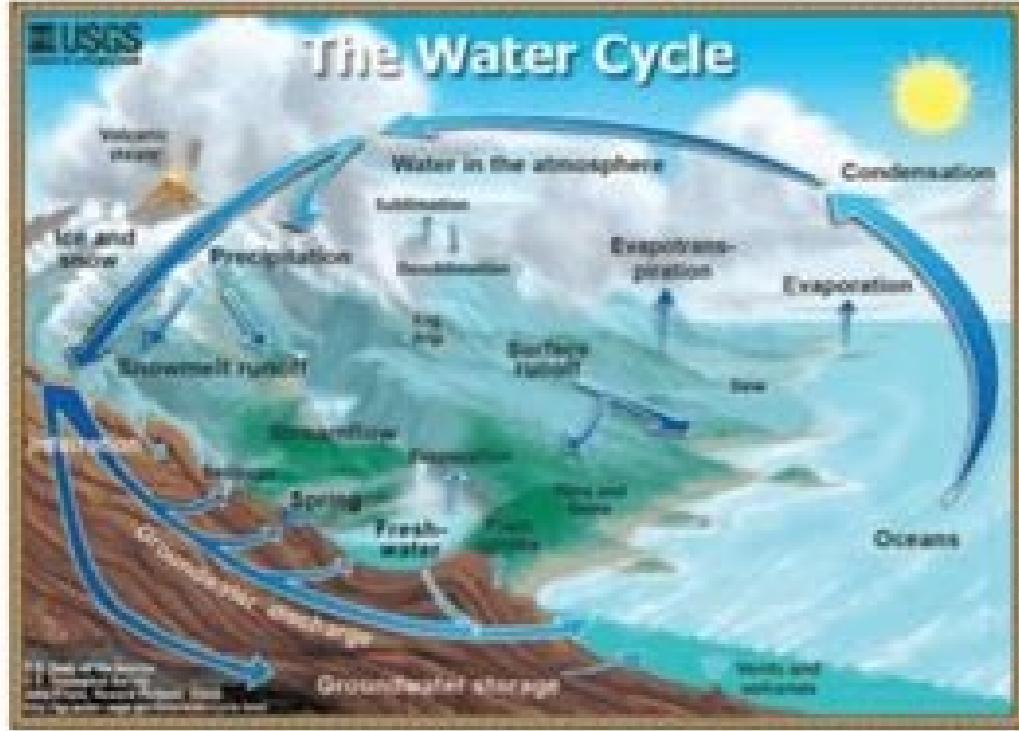

A	B	C	D	E	F
A) What part of the cell cycle diagram are you looking at? Describe what is happening.

**Biogeochemical Cycles WebQuest**

For each cycle, visit the URL address provided. At each website you will need to read the passages, answer the questions, and label the diagrams on this worksheet.

**The Water Cycle (<http://ga.water.usgs.gov/edu/watercyclesummary.html>)**

1. What percent of the earth's water is stored in the oceans of the world? \_\_\_\_\_
2. Click the link **evapotranspiration**. What is **evapotranspiration**?
3. How much water does an acre of corn transpire in one day? \_\_\_\_\_. How much water does a large oak tree transpire in one year? \_\_\_\_\_
4. What 5 factors affect transpiration rate? Then navigate back to the summary page.
  - a.
  - b.
  - c.
  - d.
  - e.
5. Click the link **Stored as Freshwater**. What percent of our freshwater supply is found in:
  - a. Glaciers and ice caps? \_\_\_\_\_
  - b. Ground water? \_\_\_\_\_
  - c. Surface water? \_\_\_\_\_
  - d. Other? \_\_\_\_\_
6. When it comes to surface water storage, which lake holds a majority of the earth's freshwater supply?  
\_\_\_\_\_ How much does it hold? \_\_\_\_\_

Name \_\_\_\_\_ Date \_\_\_\_\_

**CHAPTER 3 PRINCIPLES OF ECOLOGY**

**Review the Key Terms**

abiotic factor (ab i bikt faktur)	autotroph (aw tuh trof)
biosphere (bi o sfer)	heterotroph (hi e ter oh trof)
commensalism (kom ih nes al izm)	coevolution (koh ev yoo luh shuhn)
decomposition (de koh mpon i tih shuhn)	food chain (fud chayn)
ecosystem (EE koh sis tem)	habitat (hab uh tayt)
fixed energy (fikst en jee rye)	metabolism (meh tah bolic izm)
heterotroph (hi e ter oh trof)	parasitism (pah ree tizm)
niche (nih CHAH)	recycling (rih sih kuh luh jing)
population (poh puh lay shuhn)	symbiosis (suh bih zhuh sis)
symbiosis (suh bih zhuh sis)	trophic level (truhfik lehv)

Fill in the blank in each sentence below with the correct term from the list above. You will not use all the terms.

1. An organism's \_\_\_\_\_ is the place where it lives out its life.
2. Vultures are \_\_\_\_\_ because they eat animals that are already dead.
3. The role a species plays in its community is called its \_\_\_\_\_.
4. The study of the way organisms interact with their environment is called \_\_\_\_\_.
5. A \_\_\_\_\_ is a group of organisms that mate with one another and live in the same place at the same time.
6. A producer, or \_\_\_\_\_, uses the energy from the sun or energy stored in chemical compounds to make its own food.
7. The part of Earth that supports life is called the \_\_\_\_\_.
8. A \_\_\_\_\_ is a group of populations that interact with one another.
9. An organism that eats autotrophs is called a \_\_\_\_\_.
10. The relationship between a flea and the dog it lives on is an example of \_\_\_\_\_.

Biogeochemical cycle drawing. Biogeochemical cycle worksheet pdf.

(2 pages)4) Biogeochemical cycles crucigram- 16 vocabulary terms. Lack of compliance is a violation of the Millennium Copyright Act. The answer keys included! You may also be interested in: Ecology Notes- Complete Set (includes section on biogeochemical cycles) Introduction to ecosystems Energy Flow and ClassificationPopulation Growth Homework and ClassworkInteractive view Activities Human Population Growth Web Quest Ecology Study Guides and Unit TestJeopardy Review GameBiome Guided NotesBiome Mapping Across North America, and Biodiversity. You want this more everything that comes up and more? Follow me on customers PinterestFacebookInstagramNewsletter This activity/drawing sheet helps students to synthesize the information they have already been taught about water, carbon and nitrogen cycles, bringing them together on a single sheet. It is forbidden to copy for more than one teacher, class, department, school or district. You can get it at a discount price at the BundleVanessa Jason Biology Roots Ecology Unit For a single classroom; not be publicly shared (not create public access links). It can be used as an assessment or assignment of tasks or as a sublesson. The practice sheets are designed to strengthen biogeochemical cycles. (2 pages)3) Biogeochemical Cycles and you- do a great task! Students read about the water cycle and the carbon cycle (with a strong emphasis on fossil fuels) and answer questions of analysis. Followed by 10 questions (full and short answer). They can be used as class work or task at their discretion! The following cycles are included: Carbon Cycle Phosphorus Cycle Phosphorus Cycle (dichotomous)Included in this package are:1) Biogeochemical Cycles PowerPoint (includes notes)Biogeochemistry designed to be a class assignment in which students map and draw carbon, water and nitrogen. It can be used as a task or study guide. I've included my example, I show students. This is a set of 4 elements: a set of guided notes on biogeochemical cycles plus three additional elements: a reading exercise, drawing exercise and crossword puzzle.

We provide solutions to students. Please Use Our Service If You're: Wishing for a unique insight into a subject matter for your subsequent individual research; Custom Essay Writing Service - 24/7 Professional Care about Your Writing Summer School. Mix and match HMH programs for a summer school curriculum that drives student growth. Easy-to-implement and effective.
